

AITHEON

We believe that people create businesses to share their passions with the world. Unfortunately, today's business model is laden with back-end processes that are time consuming, complicated and require multiple systems; each to complete a different task. Passion is quickly displaced by the demands of daily operations.

Aitheon's mission is to change this.

By integrating AI and Robotics in a user friendly way, businesses become automated in a single, simple platform. This allows effortless streamlining of mundane business tasks; while simultaneously acquiring access to the latest tech and services.

We also believe that all individuals should have access to the opportunity to work. To enable these backend business processes, our AI is augmented by individuals who can work remotely from anywhere in the world.

Welcome to the digital ecosystem. We are here to enable you.

Crowdsale Information

Aitheon's crowdsale will begin on April 20, 2018 with a 30% discount (AIC tokens starting at \$0.245 each). This discount will slowly decrease until the end of the crowd-sale, ending with AIC tokens at \$0.35 each.

A hard-cap of 250m tokens will be sold during crowd-sale. Although there is a *total supply* of 3.5b tokens, there will only be up to 335m tokens *in circulation* at the end of the ICO period. The residual tokens will remain in the mining pool to be awarded to miners for augmentation of the AI and robotic services over the course of the next 60 years (approximately).

Users and Services

Mechbots & Devices - All physical robots and electronic devices are integratable on the Aitheon ecosystem. Regardless of skill level, users can perform diverse tasks, optimize productivity, increase reliability, and decrease risk.

Digibots - Virtual robots within the Aitheon ecosystem automate business processes which enable organizations to focus on their passion, instead of routine business tasks.

Aitheon Specialists - The Aitheon ecosystem employs remote professionals to assist AI in completing diverse business functions. Some examples include security monitoring, document reviewing and remote customer service.

Robot Pilots Program - From remote locations, technicians trained as Aitheon Pilots supervise and teleop robots all over the world to ensure proper performance.

Aitheon Creators Program - The Aitheon ecosystem enables innovators to design and develop new concepts for use within the platform. This platform also serves as an easy path to market for these products.

Bug Bounty - A smart contract was set forth to enforce the terms and conditions of a bug bounty, whereby any individual who identifies a bug in the open sourced code will be awarded 1000 Aitheon Tokens for making the Aitheon team aware of the bug.

Partnerships

Under a signed agreement with CarSmartt, Aitheon will be producing a fleet of driverless vehicles, set for completion in late 2018. Other public partnerships include the United Nations, Nvidia, Quanergy, Smart City, IF&LS, Masdar Institute, Future Society, AI Initiative, ABB, Universal Robotics and more to be announced. Aitheon is also currently working with multiple governments to integrate their systems onto the Aitheon platform.

COIN ALLOCATION

- 68.67% Miners pool
- 10% Aitheon Platform Development
- 7.14% Crowdsale
- 6% Aitheon Team
- 5% Rewards Pool
- 1.43% Pre-sale
- 1% Bounty Campaign
- 0.76% Aitheon Advisors

2018 Road Map

Q1-

- Public Launch
- Pre Sale
- North American Bitcoin Conference
- World Government Summit
- International upcoming project & partnership meetings tour
- Marketing campaign begins for community awareness of Aitheon capabilities

Q2-

- ICO Launch
- Tech Paper Published
- Aitheon Established in Estonia
- Begin beta testing for Aitheon Creators Program with eligible token holders
- Begin beta testing for Small to Medium Sized Businesses with eligible token holders
- Begin beta testing for the Specialists Program with eligible token holders
- Development Kits for Beta Creators available for purchase

Q3-

- Launch the Aitheon Community's new structure
- POS device available for Beta businesses.
- Creators Program fully operational
- Specialists Program public launch
- Small to Medium Sized Businesses able to utilize platform in select categories

Q4-

- Begin beta testing for Aitheon Pilots Program with eligible token holders

2019 Q1-

- Aitheon Community votes on whether to remain on Ethereum or convert to an independent coin
- Rollout of Specialists Academy, college accredited training programs
- Aitheon Pilots Program fully operational

Methods of increased value

- Monthly service contracts to business owners
- Application of robotics through the platform
- Sales of physical assets such as robots and development kits
- Monetization based on fees charged through Creators Program sales/leases
- Trading of tokens among users
- Maintenance services for robotics
- Aitheon Pilots performing add-on services
- Payment processing services

FAQ's

Does Aitheon work with other platforms?

The Aitheon APIs allow inclusion, addition, adaptation, and command/control of all robotic and AI platforms. The Aitheon services are à la carte. While the most insight would come from full implementation, we are willing to assist people in the form and manner necessary.

How will Aitheon integrate into my organization?

Aitheon is right for businesses who want to automate the mundane out of their business. As a fully functioning customizable, human augmented, digital ecosystem that uses certified professionals to help you with all of your back-end business needs, the AI ecosystem and solutions make your life simpler. Aitheon is simple to set up. Bot-Smiths can assist you with integration instead of the need for your own dedicated IT team.

How does Aitheon obtain and utilize our existing data?

Aitheon can integrate with and even replace most existing MRP, CRM and financial software. If the feature is enabled, Aitheon can crawl and mine the existing data and import the existing data to be used with the Aitheon systems. The simplification and streamlining of your organization is our business.

Can my Aitheon AI interact with other AI?

Aitheon AI can interact, negotiate and barter with internal, as well as other organizations AI. Aitheon AI can even communicate and negotiate with humans through email.

Will AI remove the need for human workers?

In short, no. Although AI can carry many tasks to 90-99% completion, humans are better at recognition and implementation in many areas. As such, Human Augmented AI is the future of business. Aitheon Specialists and Pilots, remote workers that are able to earn compensation by augmenting Aitheon AI and Robotics, are continuously vetted through consensus by their peers and are a key component to Aitheon. Aitheon allows professionals from all over the globe to work on the Aitheon platform creating new global opportunities.

Is Aitheon expandable?

Yes, Aitheon is a self-expanding, self-healing, ecosystem based on swarm cluster technology.

KYC / AML Compliance

Aitheon complies fully with all KYC and AML regulations. KYC verification is inherent in the Aitheon system, whereby simply creating an account on the Aitheon platform will alert you in real time as to your status of KYC compliance. Given instant approval, you are verified to buy tokens. We are accepting purchases from all regions including U.S. and Japan.
